Tesla Tesla

Science is always a step ahead

TESLA! Wants to be a window towards the knowledge, so we think that the best way to get it could be through entertainment. A show to make children and parents excite evenly, a TV show based in science able to make them leave the chair and put them to enjoy learning with their five senses about everything that surrounds them. The more they explore, the more they can learn.

We'll show, in a vibrating rhythm, the most curious curiosities of the science, making amazing experiments. The spectators will be able to carry out them at their houses. We'll laugh and learn that the science can be all kind of funny. Ah! Don't forget, we will visit Research Centers, schools and all that places in which the science has a choice position in their education programs.

We'll show, from a clear viewpoint and avoiding all kind of imitative behavior of risk, what an exciting the scientific world can be, and how we can learn from it, to turn this world into better place, where the only currency is the exchange of knowledge.

Fish & Chips Fish & Chips

Language learning in children through games and music

Game show that stimulates English language learning in children through games and music. Thanks to its innovative, video game-like set and graphics, it allows viewers to participate and learn from home just like the contestants on the show. Two schools compete in the contest: the Fish team and the Chips team. Each school's team consists of three players, who carry out the tests while 50 classmates from each school cheer them on and also actively participate in solving the problems. Even though it is a game show, Fish & Chips is not only about testing knowledge. Its real goal is to get kids to enjoy English.
